

## Intimate Care Policy

### Introduction

The Intimate Care Policy and Guidelines Regarding Children have been developed to safeguard children and staff. They apply to everyone involved in the intimate care of children.

Disabled children can be especially vulnerable. Staff involved with their intimate care need to be sensitive to their individual needs.

The Intimate Care Policy and Guidelines should be read in conjunction with the Area Child Protection Committee's Regional Policy and Procedures.

### Definition

Intimate care may be defined as any activity required to meet the personal care needs of each individual child. Parents / social workers have a responsibility to advise staff of the intimate care needs of their child, and staff have a responsibility to work in partnership with children and parents.

Intimate care can include:

- Feeding
- Oral care
- Washing
- Dressing/undressing
- Toileting
- Menstrual Care
- Photographs
- Treatments such as enemas, suppositories, enteral feeds
- Catheter and stoma care
- Supervision of a child involved in intimate self-care

### Principles

The following are the fundamental principles upon which the Policy and Guidelines are based:

- Every child has the right to be safe.

- Every child has the right to personal privacy.
- Every child has the right to be valued as an individual.
- Every child has the right to be treated with dignity and respect.
- Every child has the right to be involved and consulted in their own intimate care to the best of their abilities.
- Every child has the right to express their views on their own intimate care and to have such views taken into account.
- Every child has the right to have levels of intimate care that are as consistent as possible.

## Safer Recruitment Policies

All staff working with children must be vetted

*Vetting includes:*

- Access NI checks
- Pre-employment checks
- Two independent references
- Managers must ensure that all staff undertaking the intimate care of children are familiar with, and understand the Intimate Care Policy
- Intimate care arrangements must be recorded in the care plan
- Staff should not undertake any aspect of intimate care that has not been agreed
- Intimate care arrangements should be reviewed at least six monthly. The views of all relevant parties, including the child (if appropriate), should be sought and considered to inform future arrangements.
- If a staff member has concerns about a colleague's intimate care practice they must report this to their designated manager / teacher.

## Guidance for good practice

All children have the right to be safe and to be treated with dignity and respect. These guidelines are designed to safeguard children and staff.

They apply to every member of staff involved with the intimate care of children.

Disabled children can be especially vulnerable. Staff involved with their intimate care need to be sensitive to their individual needs.

Staff also need to be aware that some adults may use intimate care, as an opportunity to abuse children. It is important to bear in mind that some care tasks / treatments can be open to misinterpretation. Adhering to these guidelines of good practice should safeguard children and staff.

### *Involve the child in their intimate care*

Try to encourage a child's independence as far as possible in his / her intimate care. Where the child is fully dependent talk with them about what is going to be done and give them choice where possible.

Check your practice by asking the child / parent any likes / dislikes while carrying out intimate care and obtain consent.

Treat every child with dignity and respect and ensure privacy appropriate to the child's age and situation.

A lot of care is carried out by one staff member / carer alone with one child. The practice of providing one-one intimate care of a child alone is supported, unless the activity requires two persons for the greater comfort / safety of the child or the child prefers two persons.

### *Make sure practice in intimate care is consistent*

As a child can have multiple carers a consistent approach to care is essential. Effective communication between parents / carers / agencies ensures practice is consistent.

### *Be aware of own limitations*

Only carry out care activities you understand and feel competent and confident to carry out. If in doubt ASK. Some procedures must only be carried out by staff who have been formally trained and assessed e.g. enteral, feeding, rectal diazepam.

### *Promote positive self-esteem and body image*

Confident, self-assured children who feel their body belongs to them are less vulnerable to sexual abuse. The approach you take to intimate care can convey lots of messages to a child about their body worth. Your attitude to a child's intimate care is important. Keeping in mind the child's age, routine care can be relaxed, enjoyable and fun.

If you have any concerns you must report them.

If you observe any unusual markings, discolourations or swelling including the genital area, report immediately to your designated manager / teacher.

If during the intimate care of a child you accidentally hurt them, or the child appears to be sexually aroused by your actions, or misunderstands or misinterprets something, reassure the child, ensure their safety and report the incident immediately to your designated manager / teacher.

Report and record any unusual emotional or behavioural response by the child.

A written record of concerns must be made and kept in the child's personal file.

It is important to follow reporting and recording procedures.

Parents / carers must be informed about concerns.

## Working with children of the opposite sex

### *Principles:*

- There is a positive value in both male and female staff being involved with children.
- Ideally, every child should have the choice of carer for all their intimate care.
- The individual child's safety, dignity and privacy are of paramount importance.
- The practical guidelines set out below, are written in the knowledge that the current ratio of female to male staff means we are far less likely to be able to offer the choice of same sex carer to male children.

### *General Care*

Male and female staff can be involved with children of either sex in:

- (a) Keyworking and liaising with families.
- (b) Co-ordinating of and contribution to a child's review.
- (c) Meeting the developmental, emotional and recreational needs of the children.
- (d) Escorting the children between sites, on outings and to clinics unless intimate care is needed.

### *Intimate Care*

Wherever possible, boys and girls should be offered the choice of carer and second carer. Where there is any doubt that a child is able to make an informed choice on these issues, the child's parents / social worker are usually in the best position to act as advocates.

It may be possible to determine a child's wishes by observation of their reactions to the intimate care they receive. Do not assume that a child cannot make a choice.

## Communication with children

It is the responsibility of all staff caring for a child to ensure that they are aware of the child's method and level of communication.

Children communicate using different methods e.g. words, signs, symbols, body movements, eye pointing.

### *To ensure effective communication:*

- Ascertain how the child communicates e.g. consult with child, parent / carer and, if appropriate, communication needs must be recorded (please refer to Appendix 1, Communication Proforma for Intimate Care: How I Communicate). If further information is required please consult with the child's Speech and Language Therapist.
- Make eye contact at the child's level.

- Use simple language and repeat if necessary.
- Wait for response.
- Continue to explain to the child what is happening even if there is no response.
- Treat the child as an individual with dignity and respect.
